Part 2 核心素材与串题参考

Core 1 A park you visited / A happy day you had

Once I visited the park near my university with my friends. We went there to do some homework and kill the time.

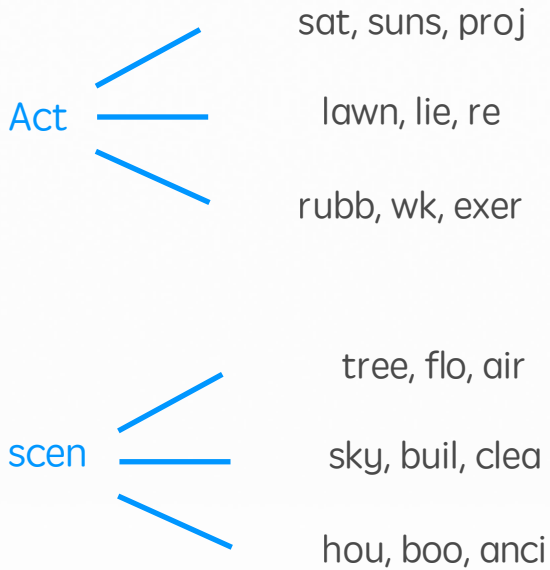

That day, we did many activities there. There was a small river in the park, so we sat on the riverside and basked in the sunshine while discussing our team project . The lawn in the center of the park was soft and clean, so we lied on it and enjoy a peaceful moment reading & chatting. What's more, there were rubber tracks for us to walk on, as well as some other sport facilities for us to exercise our legs and arms.

Another thing I like about the park is that the scenery there was fascinating . There were colorful leaves and flowers, and because of this, the air was very fresh that day. Plus, you can see the modern buildings with all these trees and the blue sky, and this scene really helped me clear my mind. Other than that, the houses and booths in the park were all in some ancient style, which gave the whole place a very unique feeling.

So, this is a park that I visited and it is a great place.

A newly built public facility that you want to visit
& A change that improved your local area

A newly built public facility I would like to visit is the new park in my hometown. I heard that it was really great.

First, it is said that it has a nice environment for us to relax. There is a small river in the park, so we can sit on the riverside and bask in the sunshine while discussing our team project. The lawn in the center of the park will be soft and clean, so we can lie on it and enjoy a peaceful moment reading & chatting. What's more, they said there will be nice rubber tracks for us to walk on, as well as some other sport facilities for us to exercise our legs and arms.

Another thing I look forward to seeing in this park is the scenery. My friend who already visited it told me that there were colorful leaves and flowers, and because of this, the air was very fresh that day. Plus, you can see the modern buildings with all these trees and the blue sky, and this scene really can help you clear my mind. Other than that, the houses and booths in the park are all in some ancient style, which give the whole place a very unique feeling.

So, I really want to visit this new park soon.

A place where you read and write (not your home)

A place where I read and write in my spare time would be the park near my home.

Firstly, it's because the environment there can help me focus on reading and writing. There **is** a small river in the park, so my friend and I **can sit** on the riverside and bask in the sunshine while discussing our team project. The lawn in the center of the park **will be** soft and clean, so we **can lie** on it and enjoy a peaceful moment reading & chatting. What's more, **there are** nice rubber tracks for us to walk on, as well as some other sport facilities for us to exercise our legs and arms.

Other than that, the scenery there really helps me enjoy my reading time there. There are colorful leaves and flowers, and because of this, the air was very fresh that day. Plus, you can see the modern buildings with all these trees and the blue sky, and this scene really **can help** you clear my mind. Other than that, the houses and booths in the park **are** all in some ancient style, which **give** the whole place a very unique feeling.

So, That's a place where I like to read and write something.

A colorful place

The colorful place I once went to would be the park near my home and last time I also visited there as well.

First of all, its environment offers lots of colors. There was a small river in the park, so we sat on the riverside and basked in the sunshine while discussing our team project . The lawn in the center of the park was soft and clean, so we lied on it and enjoy a peaceful moment reading & chatting. What's more, there were rubber tracks for us to walk on, as well as some other sport facilities for us to exercise our legs and arms.

Another thing that is worth mentioning would be the scenery there.

There were colorful leaves and flowers, and because of this, the air was very fresh that day. Plus, you can see the modern buildings with all these trees and the blue sky, and this scene really can help you clear my mind. Other than that, the houses and booths in the park are all in some ancient style, which give the whole place a very unique feeling.

So, this is the colorful place I went to.

A school you went to in your childhood

I would like to talk about the primary school I used to go to when I was a child. I spend about four years in that school.

As far as I can remember, it has a very nice environment. There was a small river in the school, so my classmates and I often sat on the riverside and basked in the sunshine while discussing our team project . The lawn in the center of the school was soft and clean, so we also liked to lie on it and enjoy a peaceful moment reading & chatting. What's more, there were rubber tracks in the playground for us to walk on, as well as some other sport facilities for us to exercise our legs and arms.

And last time when I visited my primary school again, I found that the sceneries there are still very fascinating. There were colorful leaves and flowers, and because of this, the air was very fresh all the time. Plus, you can see the modern teaching buildings with all these trees and the blue sky, and this scene really helped me clear my mind. Other than that, the houses and shops in the school were all in some ancient style, which gave the whole campus a very unique feeling.

So, that is the school I would like to talk about.

A time you went out with someone but felt bored

Once I went out with my friends and they took me to this symbol park in their community, so I felt really bored.

The first reason for the boredom is there were nothing much for us to do. There was a **dirty** river in the park, so we **couldn't sit** on the riverside and basked in the sunshine while discussing our team project **as we planned**. The lawn in the center of the park was **not** soft and clean, so we **couldn't lie** on it and enjoy a peaceful moment reading & chatting. What's more, **even though** there were rubber tracks for us to walk on, as well as some other sport facilities for us to exercise our legs and arms, **we just didn't want to try them**.

Also, the sceneries were not so fascinating. There were **no** leaves and colorful flowers, ~~and because of this, the air was very fresh that day.~~ Plus, you can see the modern buildings with all these trees and the **grey** sky, and this scene **was not so pleasant**. Other than that, the houses and booths in the park were all in some ancient style, which gave the whole place a very **stubborn** feeling.

So, I don't really enjoy that visit.

A picture in your home and you like to look at

A picture I like to look at would be the one I took with my friends the day we hung out in a beautiful park.

The moment we took the photo, we were sitting by the riverside and ~~There was a small river in the park, so we sat on the riverside and~~ basking in the sunshine while discussing our team project . From the picture, you can see the lawn in the center of the park was soft and clean, so we lied on it and enjoy a peaceful moment reading & chatting. What's more, you can also find there were rubber tracks for us to walk on, as well as some other sport facilities for us to exercise our legs and arms.

Every time I look at this picture, it reminds me of the wonderful scenery we saw that day. I remember, There were colorful leaves and flowers, and because of this, the air was very fresh that day. Plus, you can see the modern buildings with all these trees and the blue sky, and this scene really helped me clear my mind. Other than that, the houses and booths in the park were all in some ancient style, which gave the whole place a very unique feeling.

So, that's the picture I like.

Core 2 a person you know who is good at a foreign language

The person who is good at a foreign language and I'd like to talk about is my best friend Emmy, who has been learning Japanese since middle school and really good at it.

She is very talented in learning foreign languages. Actually she doesn't have a very specific method to learn it. In her daily life, she just likes to watch Japanese cartoons and TV series a lot, and gets many useful vocabularies from them. Also, she mastered Japanese conversation quickly by just practicing with classmates in Japanese every day. That's so amazing. What's more, Japanese pronounces differently from Chinese and it can take me forever to memorize all the rules. But she totally nailed it.

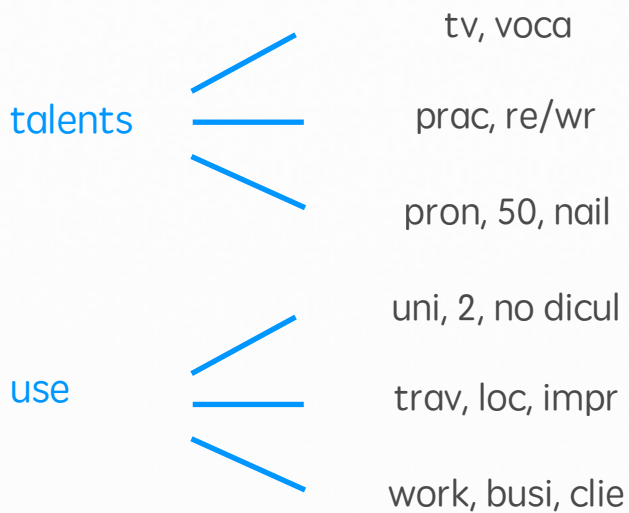

The reason why I think she is good at this language is that she speaks fluent Japanese, just like a native speaker. She spent two years studying in a top-tier Japanese university as an exchange student without any difficulties. Plus, when she goes traveling in Japan, she is not afraid to talk to the locals directly, which is very cool. At work, because she can conduct business conversations in Japanese with her colleagues and her clients fluently, she got a promotion real quick.

So, my friend Emmy is really good at Japanese.

串题:

A time you offered to help others

&A time when others gave you advice about choosing major/job

One time I offered to help my sister with deciding what major she should choose. She asked me whether she should study Japanese in the university.

Firstly, I helped her realize her strength in learning foreign language. You see, Actually she doesn't have a very specific method to learn it. In her daily life, she just likes to watch Japanese cartoons and TV series a lot, and gets many useful vocabularies from them. Also, she mastered Japanese conversation quickly by just practicing with classmates in Japanese every day. That's so amazing. What's more, Japanese pronounces differently from Chinese and it can take me forever to memorize all the rules. But she totally nailed it. So I told her to be confident about herself.

Also, we looked at the future career and life possibilities after choosing this major, so that we can make a reasonable choice. Like She will have the chance to spend two years studying in a top-tier Japanese university as an exchange student without any difficulties. Plus, when she goes traveling in Japan, she can no longer be afraid to talk to the locals directly, which is very cool. At work, if she can conduct business conversations in Japanese with her colleagues and her clients fluently, she can get a promotion real quick. Which will be so nice.

So, with my help, she finally made up her mind.

A goal you tried your best to achieve

A goal I tried to achieve was mastering Japanese with 2 years and I made it.

You see, here is how I learnt it. Actually I don't have a very specific method to learn it. In my daily life, I just like to watch Japanese cartoons and TV series a lot, and get many useful vocabularies from them. Also, I mastered Japanese conversation quickly by just practicing with classmates in Japanese every day. That's so amazing. What's more, Japanese pronounces differently from Chinese and it can take me forever to memorize all the rules. But I finally nailed it.

With this skill, I can achieve greater goals in the future. I want to spend two years studying in a top-tier Japanese university as an exchange student without any difficulties next year. Plus, when I go traveling in Japan, I want to be able to talk to the locals directly, which is very cool. At work, if I can conduct business conversations in Japanese with my colleagues and her clients fluently, I believe I can get a promotion real quick.

So, mastering Japanese is the goal I achieved and I am still working on it.

An occasion when you first met someone & An interesting conversation with a stranger

Once I met a very smart person in a language competition. I got so interested in her, and talked with her for quite a while.

You know, the way she studies language is very different. She told me that Actually she doesn't have a very specific method to learn it. In her daily life, she just likes to watch Japanese cartoons and TV series a lot, and gets many useful vocabularies from them. Also, she mastered Japanese conversation quickly by just practicing with classmates in Japanese every day. That's so amazing. What's more, Japanese pronounces differently from Chinese and it can take me forever to memorize all the rules. But she totally nailed it.

Also, she inspired me with so many interesting experiences she had. I heard that She spent two years studying in a top-tier Japanese university as an exchange student without any difficulties. Plus, when she goes traveling in Japan, she is not afraid to talk to the locals directly, which is very cool. At work, because she can conduct business conversations in Japanese with her colleagues and her clients fluently, she got a promotion real quick.

So, even though that was the first time we met, she left a very deep impression on me.

A family member that you spent the most time with

The family member I spent the most time with is my sister and I admire her a lot, since she is so good at everything she did.

First, She is very talented in learning foreign languages. Actually she doesn't have a very specific method to learn it. In her daily life, she just likes to watch Japanese cartoons and TV series a lot, and gets many useful vocabularies from them. Also, she mastered Japanese conversation quickly by just practicing with classmates in Japanese every day. That's so amazing. What's more, Japanese pronounces differently from Chinese and it can take me forever to memorize all the rules. But she totally nailed it.

Also, her life experience is very impressive as well. I mean, She spent two years studying in a top-tier Japanese university as an exchange student without any difficulties. Plus, when she goes traveling in other countries, she is not afraid to talk to the locals directly, which is very cool. At work, because she can conduct business conversations professionally with her colleagues and her clients fluently, she got a promotion real quick.

So, this is the family member I wanna talk about.

Core 3 A product that is based on AI

An important technological product you bought

A product based on AI technology I would talk about is the T-mall genie produced by Alibaba. It looks like a stereo, and you can activate it with your voice.

The first thing I would like to mention is that it has a nice appearance. It is a black rectangle designed to look like a cat with 2 ears on the top, and it also has big eyes in the front, which make it look pretty cute. And beside the ears, the buttons that we press to turn it on are also on the top. Their size is proper and looks simple. Plus, the T-mall genie is not that big, so I can easily take it anywhere and it's pretty user-friendly.

Other than that, its functions are amazing. Firstly, it is a good companion. It can teach children how to do homework, or talk with old people living alone without any kids around. Also, It can help you enjoy your spare time better. If you want some music, just tell it the name of the song and then it will automatically play it for you. What's more, if you talk to it very often, it can identify your voice from the others', so it can recognize who is its real owner and only respond to him/her.

So, I think it is a very interesting and useful product in our life.

串题:

Something you bought but was difficult to use at first

Something I bought but was difficult to use at first is the T-mall genie produced by Alibaba. It looks like a stereo, and you can activate it with your voice.

At first, I didn't know how to activate it, since the design was too simple and hard to find the setting buttons. It is a black rectangle designed to look like a cat with 2 ears on the top, and it also has big eyes in the front, which make it look pretty cute. I didn't see that beside the ears, the buttons that we press to turn it on are also on the top. Their size is proper and looks simple. Plus, the T-mall genie is not that big, so I can easily take it anywhere and it's pretty user-friendly.

After I found the buttons, I finally get that its functions are very amazing. Firstly, it is a good companion. It can teach children how to do homework, or talk with old people living alone without any kids around. Also, It can help you enjoy your spare time better. If you want some music, just tell it the name of the song and then it will automatically play it for you. What's more, if you talk to it very often, it can identify your voice from the others', so it can recognize who is its real owner and only respond to him/her.

So, that's the product I want to talk about.

A gift you spent a long time preparing

The gift I spent a long time preparing for my parents is the T-mall genie produced by Alibaba. It looks like a stereo, and you can activate it with your voice.

First, I chose it because its appearance is classic and suitable for people at my parents' age. It is a black rectangle designed to look like a cat with 2 ears on the top, and it also has big eyes in the front, which make it look pretty cute. And beside the ears, the buttons that we press to turn it on are also on the top. Their size is proper and looks simple. Plus, the T-mall genie is not that big, so I can easily take it anywhere and it's pretty user-friendly.

Also, I think its functions can really help my parents a lot. Firstly, it is a good companion. It can teach my younger brothers how to do homework, or talk with old people living alone without any kids around. Also, It can help them enjoy your spare time better. If they want some music, just tell it the name of the song and then it will automatically play it for them. What's more, if they talk to it very often, it can identify their voice from the others', so it can recognize who is its real owner and only respond to my parents.

So, I think it is a suitable gift for my parents.

A time that you spent a lot of money on something

Once I spent a lot of money buying a smart assistant, which is called T-mall genie produced by Alibaba and costed me about 500 RMB, that's a lot of money for me a few years ago.

I wanted to buy it because its appearance attracted me. It is a black rectangle designed to look like a cat with 2 ears on the top, and it also has big eyes in the front, which make it look pretty cute. And beside the ears, the buttons that we press to turn it on are also on the top. Their size is proper and looks simple. Plus, the T-mall genie is not that big, so I can easily take it anywhere and it's pretty user-friendly.

Also, I was curious about its functions, since this kind of product is artificial intelligence. Firstly, it is said to be able to teach children how to do homework, or talk with old people living alone without any kids around. Also, It can help you enjoy your spare time better. If you want some music, just tell it the name of the song and then it will automatically play it for you. What's more, if you talk to it very often, it can identify your voice from the others', so it can recognize who is its real owner and only respond to him/her.

So, after a lot of hesitation, I bought it and I am still using it now.

A good experience of online shopping

Once I bought a smart item online, and I was very satisfied with this shopping experience. The thing I bought was T-mall genie produced by Alibaba. It looks like a stereo, and you can activate it with your voice.

The first thing I was happy about is that it looked exactly the same as I imagined according to the pictures I saw in the shop. It is a black rectangle designed to look like a cat with 2 ears on the top, and it also has big eyes in the front, which make it look pretty cute. And beside the ears, the buttons that we press to turn it on are also on the top. Their size is proper and looks simple. Plus, the T-mall genie is not that big, so I can easily take it anywhere and it's pretty user-friendly.

Other than that, its functions are amazing. Firstly, it is a good companion. It can teach children how to do homework, or talk with old people living alone without any kids around. Also, It can help you enjoy your spare time better. If you want some music, just tell it the name of the song and then it will automatically play it for you. What's more, if you talk to it very often, it can identify your voice from the others', so it can recognize who is its real owner and only respond to him/her.

So, I was very satisfied with this item and gave a good feedback to the shop.

Core 4 A trip made by public transportation

An enjoyable trip you made

A trip I made by public transportation was the one I made in Hokkaido, Japan with my Best friend.

Before we went for the trip, we made a lot of preparation for the traffic.

First, we booked the hotel and airplane tickets. Because we were all students at the time, so we decided to buy Rail pass tickets, so that the price for us to travel around by railway could be more affordable. Then, when we were deciding when to take off every morning, we checked the timetable of the railways and subway in each city we were going to visit. Also, we needed to make sure whether we should walk or take a bus, when we wanted to go to a certain tourist attraction from our hotel.

During the trip, the most memorable part was the day we took an intercity bus to Hakodate from Sapporo. It was a five-hour bus trip.

Along the way, we stopped at 2 rest stops for passengers to go to the toilet or buy some food and drinks from the convenience stores. What surprised me the most is that the environment and facilities on the bus were all so nice. The chairs were clean and soft and they even offered warm blanket for each passenger. The driver was also very friendly and gentle, so we arrived at our destination comfortably by the bus.

So, that was the trip I made by public transportation.

An unforgettable day

An unforgettable day I had was the day I took an intercity bus to Hakodate from Sapporo.

Before we took the bus and were only making plans, we never knew it would be so great. First, we booked the hotel and airplane tickets.

Because we were all students at the time, so we decided to buy Rail pass tickets, so that the price for us to travel around by railway could be more affordable. Then, when we were deciding when to take off every morning, we checked the timetable of the railways and subway in each city we were going to visit. Also, we needed to make sure whether we should walk or take a bus, when we wanted to go to a certain tourist attraction from our hotel.

During the bus trip, the whole experience was like a dream . It was a five-hour bus trip. Along the way, we stopped at 2 rest stops for passengers to go to the toilet or buy some food and drinks from the convenience stores. What surprised me the most is that the environment and facilities on the bus were all so nice. The chairs were clean and soft and they even offered warm blanket for each passenger. The driver was also very friendly and gentle, so we arrived at our destination comfortably by the bus.

So, that was a pretty unforgettable day.

A leisure activity you do with your family

A leisure activity I like to do with my family is traveling. We make a family trip to foreign countries every year.

Before we go for the trip, we have a clear division of work. First, I book the hotel and airplane tickets. Most of the time, we like to buy Rail pass tickets, so that the price for us to travel around by railway could be more affordable. Then, when we are deciding when to take off every morning, my father checks the timetable of the railways and subway in each city we are going to visit. Also, my mom needs to make sure whether we should walk or take a bus, when we want to go to a certain tourist attraction from our hotel.

During the trip, we all like to try different ways to explore the place. Like last time we took an intercity bus to Hakodate from Sapporo in Japan. It was a five-hour bus trip. Along the way, we stopped at 2 rest stops for passengers to go to the toilet or buy some food and drinks from the convenience stores. What surprised me the most is that the environment and facilities on the bus were all so nice. The chairs were clean and soft and they even offered warm blanket for each passenger. The driver was also very friendly and gentle, so we arrived at our destination comfortably by the bus.

So, my family always like to have this kind of experience together when traveling.

A software you often use

A software I often use is a travel app called mafengwo, since it can offer me thorough information about my destination.

Before I make a trip, I often use it to do some booking and planning.

First, I often book the hotel and airplane tickets there. Sometimes I like to buy Rail pass tickets in the app, so that the price for me to travel around by railway could be more affordable. Then, when I am deciding when to take off every morning, I can check the timetable of the railways and subway in each city I am going to visit. Also, I can make sure whether I should walk or take a bus, when I want to go to a certain tourist attraction from my hotel.

Also, this travel app may sometimes recommend some special tour choices. Like last time I made a five-hour bus trip according to its recommendation and it was great. Along the way, we stopped at 2 rest stops for passengers to go to the toilet or buy some food and drinks from the convenience stores. What surprised me the most is that the environment and facilities on the bus were all so nice. The chairs were clean and soft and they even offered warm blanket for each passenger. The driver was also very friendly and gentle, so we arrived at our destination comfortably by the bus.

So, I really like to use this app.

Core 5 A singer you like

The singer that I like is Rihanna, who is a popular and successful American singer.

At first, I was attracted by her music. You see, she has got a special voice which sounds amazing no matter what song she's singing. And her music style is a mix of pop, R&B and hip-hop, which is welcomed by many people in the world. Plus, her performance is always very wonderful, like once she performed in Victoria's secret show, and the dress she wore, the catwalk she made as well as the make-up were all perfect. Besides, her cooperation with other musicians is never disappointing, like the song < Lemon > she sang with Pharrell Williams.

Then, her performance is very unique. She often starts her show with a cool dance performed by a big group of dancers, which creates a mysterious and powerful atmosphere for the audience. And she always walks around the stage many times to get used to the place, so that she can dance and move freely when the show is on, and express her feeling without worries. Also, she likes to treat her coworkers with a free trip after every show, and they work like a family, I guess that's why her performance is always very exciting.

So, I really admire and respect this woman.

串题:

A person who is good at his/her job*

The person who is good at her job and I would like to talk about is Rihanna, who is a popular American singer and a successful businesswoman.

First, as a singer, her music is successful. You see, she has got a special voice which sounds amazing no matter what song she's singing. And her music style is a mix of pop, R&B and hip-hop, which is welcomed by many people in the world. Plus, her performance is always very creative, like once she performed in Victoria's secret show, and the dress she wore, the catwalk she made as well as the make-up were all perfect. Besides, her cooperation with other musicians is never disappointing, like the song < Lemon > she sang with Pharrell Williams.

Then, she is good at performing her talents on the stage. She often starts her show with a cool dance performed by a big group of dancers, which creates a mysterious and powerful atmosphere for the audience. And she always walks around the stage many times to get used to the place, so that she can dance and move freely when the show is on, and express her feeling without worries. Also, she likes to treat her coworkers with a free trip after every show, and they work like a family, I guess that's why her performance is always very exciting.

So, I think she is really good at her job.

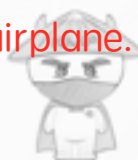

A person who often takes the airplane

The person who often takes the airplane is Rihanna, who is a popular American singer and a successful businesswoman.

First, she needs to sing and perform for different shows by airplane. You see, she has got a special voice which sounds amazing no matter what song she's singing. And her music style is a mix of pop, R&B and hip-hop, which is welcomed by many people in the world. Plus, her performance is always very creative, like once she flew to perform in Victoria's secret show, and the dress she wore, the catwalk she made as well as the make-up were all perfect. Besides, her cooperation with other musicians is never disappointing, like the song < Lemon > she sang with Pharrell Williams.

Also, she often needs to hold concerts in different countries and fly there in advance for rehearsal. She needs to start her show with a cool dance performed by a big group of dancers, which creates a mysterious and powerful atmosphere for the audience. And she always walks around the stage many times to get used to the place, so that she can dance and move freely when the show is on, and express her feeling without worries. Also, she likes to treat her coworkers with a free trip after every show, so that's one of the reasons for taking planes.

So, that's the person who often takes the airplane.

A person you saw in the news who you really want to meet

The person I saw in the news and would like to meet is Rihanna, who is a popular American singer and a successful businesswoman.

If possible, I would love to listen to her singing right in front of me. You see, she has got a special voice which sounds amazing no matter what song she's singing. And her music style is a mix of pop, R&B and hip-hop, which is welcomed by many people in the world. Plus, her performance is always very creative, like once she performed in Victoria's secret show, and the dress she wore, the catwalk she made as well as the make-up were all perfect. Besides, her cooperation with other musicians is never disappointing, like the song < Lemon > she sang with Pharrell Williams was one of my favorite songs.

Also, I would love to watch her concerts closely, because her performances are very unique. She often starts her show with a cool dance performed by a big group of dancers, which creates a mysterious and powerful atmosphere for the audience. And she always walks around the stage many times to get used to the place, so that she can dance and move freely when the show is on, and express her feeling without worries. Also, she likes to treat her coworkers with a free trip after every show, and they work like a family, I guess that's why her performance is always very exciting.

So, I really want to meet Rihanna one day.

An event that you find excited about & A performance that you enjoyed

The last time I found excited about an event was the time I watched Rihanna's concert.

It was so amazing when you actually see her singing and dancing in front of you. You see, she has got a special voice which sounds amazing no matter what song she's singing. And her music style is a mix of pop, R&B and hip-hop, which is welcomed by many people in the world. Plus, her performance was very creative, ~~like once she performed in Victoria's secret show,~~ and the dress she wore, the catwalk she made as well as the make-up were all perfect. Besides, her cooperation with other musicians in the concert was not disappointing, like the song < Lemon > she sang with Pharrell Williams was so great.

Also, the whole performance was very unique. She started her show with a cool dance performed by a big group of dancers, which created a mysterious and powerful atmosphere for the audience. And she always walked around the stage many times to get used to the place, so that she could dance and move freely when the show is on, and express her feeling without worries. Also, I heard she treated her coworkers with a free trip after that show, and they work like a family, I guess that's why her performance was so exciting.

So, I really enjoyed that show and it made me excited as well.

Core 6 A uniform you wore

I would like to talk about my uniform back in middle school.

At that time, the uniform was a must for every student. Our school asked us to wear uniform every day, I guess that was because they wanted us to focus on the study rather than some fashion. Our uniform is in blue and white, and there was a school badge on the left side of the chest. Every semester, we would buy two sets of uniform, one for summer and one for winter.

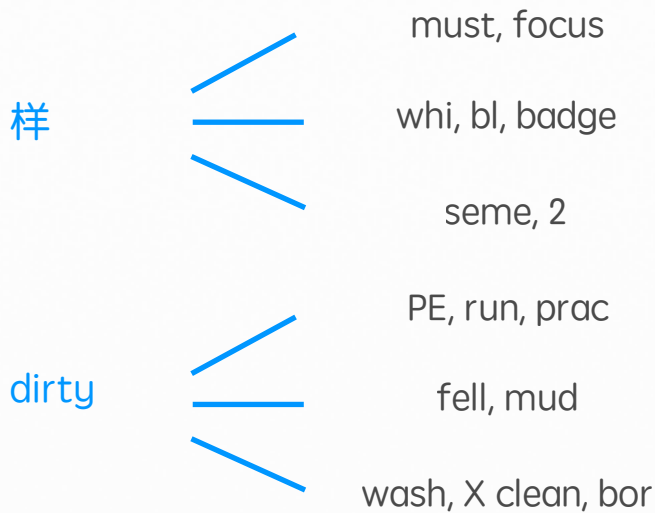

I remember one time, I was so panic because of the uniform. That day, I wore my uniform to the PE class, and we were asked to go running and practice volleyball. And I was so terrible at catching the ball, so it hit on me several times, and one time I even accidentally fell on the ground. As a result my uniform was full of mud. I put it under some running water right away and tried to clean it, but unfortunately I couldn't make it. So I had to borrow the uniform of my older sister to wear the next day, while mine was being washed and fixed in the dry cleaning shop.

So, you can really see that the uniform was a very important item for us at the time, so that's why I would like to talk about it.

A time when you didn't tell your friend the truth

Once I almost ruined my friend's uniform and I lied about it at first, in case she got too mad at me.

I didn't dare to tell her the truth, because at that time, the uniform was a must for every student. Our school asked us to wear uniform every day, I guess that was because they wanted us to focus on the study rather than some fashion. Our uniform is in blue and white, and there was a school badge on the left side of the chest. Every semester, we would buy two sets of uniform, one for summer and one for winter, which means she only got that one to wear that semester.

So when I made the uniform I borrowed from her dirty, I was so panic. That day, I wore the uniform to the PE class, and we were asked to go running and practice volleyball. And I was so terrible at catching the ball, so it hit on me several times, and one time I even accidentally fell on the ground. As a result my uniform was full of mud. I put it under some running water right away and tried to clean it, but unfortunately I couldn't make it. So I had to give her my older sister's to wear the next day, since they wore the same size, while hers was being washed and fixed in the dry cleaning shop.

So, I just told her that my sister's uniform was actually hers.

A time when someone apologized to you

Once my friend borrowed my uniform, and accidentally made it dirty, so she apologized to me for that.

She felt sorry for that, because at that time, the uniform was a must for every student. Our school asked us to wear uniform every day, I guess that was because they wanted us to focus on the study rather than some fashion. Our uniform is in blue and white, and there was a school badge on the left side of the chest. Every semester, we would buy two sets of uniform, one for summer and one for winter, which means I only got that one to wear that semester.

So when she made the uniform she borrowed from me dirty, she was so panic. That day, she wore my uniform to the PE class, and she was asked to go running and practice volleyball. And she was so terrible at catching the ball, so it hit on her several times, and one time she even accidentally fell on the ground. As a result, my uniform was full of mud. She told me when saying sorry that She put it under some running water right away and tried to clean it, but unfortunately she couldn't make it. So she gave me the uniform of her older sister to wear the next day, while mine was being washed and fixed in the dry cleaning shop.

So, this is the time I would like to talk about.

Something you borrowed from others

Something I borrowed from my older sister once is her uniform.

I lost mine accidentally, but at that time, the uniform was a must for every student. Our school asked us to wear uniform every day, I guess that was because they wanted us to focus on the study rather than some fashion. So, I had to borrow my sister's. Our uniform is in blue and white, and there was a school badge on the left side of the chest. Every semester, we would buy two sets of uniform, one for summer and one for winter, which means I only got that one to wear that semester.

So when I made the uniform I borrowed from her dirty, I was so panic.

That day, I wore the uniform to the PE class, and we were asked to go running and practice volleyball. And I was so terrible at catching the ball, so it hit on me several times, and one time I even accidentally fell on the ground. As a result my uniform was full of mud. I put it under some running water right away and tried to clean it, but unfortunately I couldn't make it. So I had to take it to the dry cleaning shop immediately.

Fortunately I cleaned it at last and that was the whole story about it.

Something you found that other people lost

/Something you lost but got back at last/

Once I lost my precious uniform accidentally, but thank god I got it back.

At that time, the uniform was a must for every student. Our school asked us to wear uniform every day, I guess that was because they wanted us to focus on the study rather than some fashion. Our uniform is in blue and white, and there was a school badge on the left side of the chest. Every semester, we would buy two sets of uniform, one for summer and one for winter, which means I only got that one to wear that semester.

So when I lost it, I was so panic. That day, I put the uniform in the changing room after the PE class, since we were asked to go running and practice volleyball. And I was so terrible at catching the ball, so it hit on me several times, and one time I even accidentally fell on the ground. As a result my uniform was full of mud. I put it under some running water right away and tried to clean it, but forgot to take it with me. So I thought I lost it at first. Then a classmate found it and gave it back to me, and that saved my life !

So, that's something I lost but got back later.

Core 7 A delayed trip

A delayed trip I'd like to talk about was once when I flew back to Beijing from Berlin, my transfer flight in Poland got delayed.

Before the delay, we already sensed some unusual signs. We were all very tired, since we woke up very early that morning, and carried a very heavy suitcase to the Berlin airport by train. When we got to Poland, we were supposed to be there only for four hours, and then we could take another flight to Beijing. But it suddenly rained heavily and seemed not so possible to stop very soon. So some of the passengers started to get very upset, and the airline workers had to comfort them several times.

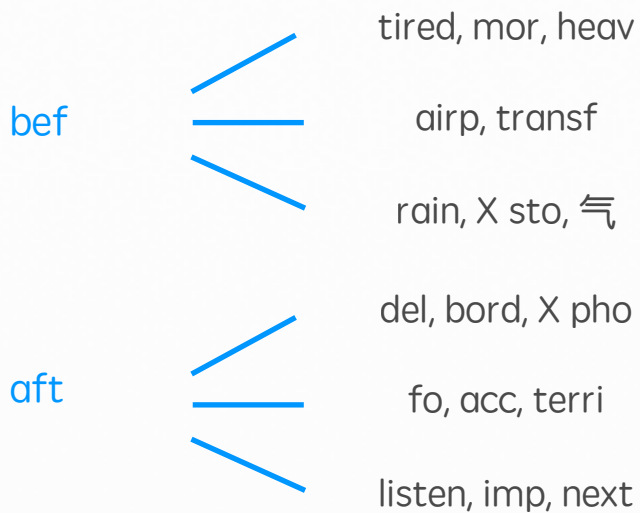

After a while, the broadcast informed us that this flight was delayed because of the heavy rain, and passengers please wait patiently. While waiting, I got so bored because I couldn't use my phone. I didn't a local Sim card and it didn't have any signal. For hours, it was still raining, so some of the passengers started to ask for food and accommodation, some of them even showed a very terrible attitude. And I had to listen to them very carefully just in case I missed any important information and didn't know what we were supposed to do next.

At last, the airline workers took us to a hotel nearby and said that new flights would be arranged tomorrow and send us home, so that was the end of the story.

A time when the weather stop you from doing what you've planned to do

Once when I flew back to Beijing from Berlin, my transfer flight in Poland got delayed **by the weather**.

Before the delay, we already sensed some unusual signs. We were all very tired, since we woke up very early that morning, and carried a very heavy suitcase to the Berlin airport by train. When we got to Poland, we were supposed to be there only for four hours, and then we could take another flight to Beijing. But it suddenly rained heavily and seemed not so possible to stop very soon. So some of the passengers started to get very upset, and the airline workers had to comfort them several times.

After a while, the broadcast informed us that this flight was delayed because of the heavy rain, and passengers please wait patiently. While waiting, I got so bored because I couldn't use my phone. I didn't a local Sim card and it didn't have any signal. For hours, it was still raining, so some of the passengers started to ask for food and accommodation, some of them even showed a very terrible attitude. And I had to listen to them very carefully just in case I missed any important information and didn't know what we were supposed to do next.

So, the whole plan was greatly affected by the rain at that time.

A time you couldn't use the mobile phone

Once I couldn't use the mobile phone during the whole trip in Europe, since I was somehow not allowed to activate international roaming.

I had to follow my friend's order all the time, since she could use the phone to look for information and make the plan. One day, We were all very tired, since we woke up very early that morning, and carried a very heavy suitcase to the Berlin airport by train. When we got to Poland, we were supposed to be there only for four hours, and then we could take another flight to Beijing. But it suddenly rained heavily and seemed not so possible to stop very soon. ~~So some of the passengers started to get very upset, and the airline workers had to comfort them several times.~~

After a while, the broadcast informed us that this flight was delayed because of the heavy rain, and passengers please wait patiently. While waiting, I got so bored because I couldn't use my phone. I didn't have a local Sim card and it didn't have any signal. For hours, it kept raining, the only fun for me was to listen to some of the passengers asking for food and accommodation, some of them even showed a very terrible attitude. And I had to listen to them very carefully just in case I missed any important information and didn't know what we were supposed to do next.

So, that was pretty much the only experience where I couldn't use my phone.

A job that you don't want to do

The job I don't want to do is airline staff, because according to the things I went through, I think this job is very depressing and difficult.

First, I think they can't sleep and rest well in the job. They are all very tired, since they have to wake up very early every morning, and carry a very heavy suitcase to the airport. When they get there, they can be there only for four hours, and then they have to take another flight to another city. If it suddenly rained heavily and seemed not so possible to stop very soon. So some of the passengers may start to get very upset, and the airline workers have to comfort them several times. It can be so tiring.

I remember once I saw the passengers got mad at the airline staffs. The broadcast informed us that this flight was delayed because of the heavy rain, and passengers please wait patiently. ~~While waiting, I got so bored because I couldn't use my phone. I didn't a local Sim card and it didn't have any signal.~~ For hours, it was still raining, so some of the passengers started to ask for food and accommodation, some of them even showed a very terrible attitude. And I had to listen to them very carefully just in case I missed any important information and didn't know what we were supposed to do next.

So, according to what I have experienced, I don't want to be an airline staff.

A time when you felt tired but had to stay awakened

A time I felt really tired but had stay awakened was during the transfer in Poland airport.

We were all very tired, since we woke up very early that morning, and carried a very heavy suitcase to the Berlin airport by train. When we got to Poland, we were supposed to be there only for four hours, and then we could take another flight to Beijing. But it suddenly rained heavily and seemed not so possible to stop very soon. So some of the passengers started to get very upset, and the airline workers had to comfort them several times.

Also, because of this emergency, we had to stay awakened to wait for further notice. After a while, the broadcast informed us that this flight was delayed because of the heavy rain, and passengers please wait patiently. While waiting, I got so bored because I couldn't use my phone. I didn't a local Sim card and it didn't have any signal. For hours, it was still raining, so some of the passengers started to ask for food and accommodation, some of them even showed a very terrible attitude. And I had to listen to them very carefully just in case I missed any important information and didn't know what we were supposed to do next.

So, that was the time I had to stay awake despite the tiredness.

Core 8 A small company that's successful

Well, a small company that is successful would be the one that my classmates founded during the university time. It mainly helps students to apply for exchange programs and arrange their tickets and accommodation.

The reason for this company to be built was that there were a lot of needs. Many students had the needs to study abroad, but the chances offered by our own departments were very limited. Then some of them started to search for information and apply for an exchange program by themselves, however, all the application and communication were not easy to them to handle on their own. So, some of my classmates took the chance to start this company and make some money by doing this job for those students, so they applied for the start-up sponsorship from the school and founded this company.

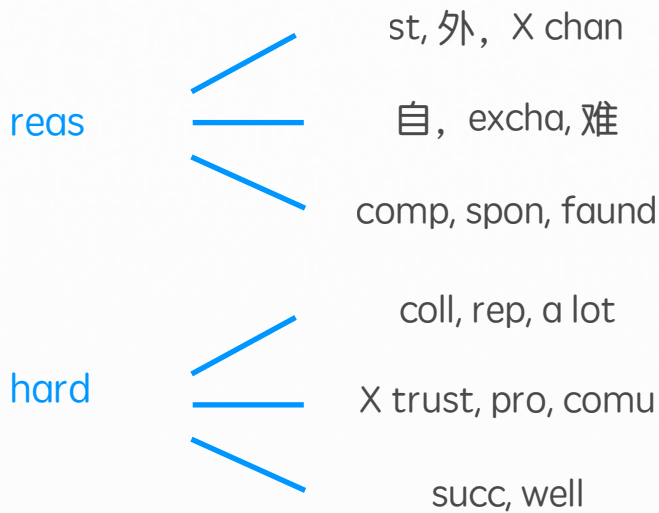

However, it wasn't easy for them to run a company at first. They needed to collect all the course information in different overseas universities, and organized them into a clear report for every client, which is a lot of work. Also, the students who used this service didn't have faith in them so much at first, so they spent quite a long time promoting their company and communicating with their clients. With their hard work, they finally made it and more and more students would purchase their service, so it worked out pretty well.

So, that's the company I would like to talk about.

The biggest challenge you've ever encountered

A time when you were in a team with others

Well, The biggest challenge I have ever encountered was building up a business team in the university with my friends .

The reason for this company to be built was that there were a lot of needs. Many students had the needs to study abroad, but the chances offered by our own departments were very limited. Then some of them started to search for information and apply for an exchange program by themselves, however, all the application and communication were not easy to them to handle on their own. So, we took the chance to start this company and make some money by doing this job for those students, so we applied for the start-up sponsorship from the school and founded this company.

However, it wasn't easy for us to run it at first. We needed to collect all the course information in different overseas universities, and organized them into a clear report for every client, which is a lot of work. Also, the students who used this service didn't have faith in us so much at first, so we spent quite a long time promoting their company and communicating with our clients. With our hard work, we finally made it and more and more students would purchase our service, so it worked out pretty well.

So, that's the challenge we had before.

A person who taught you something important

A new skill you have learned (注* how to run a business)

Once my older brother taught me how to take the chance and earn some money by myself in the university. He is a leader in his company, so I think his advice was really useful.

The reason for this to happen was I told him that Many students had the needs to study abroad, but the chances offered by our own departments were very limited. Then some of them started to search for information and apply for an exchange program by themselves, however, all the application and communication were not easy to them to handle on their own. So, **we wanted to take** the chance to start this company and make some money by doing this job for those students, **but we were not sure what todo.** so **he taught me to** apply for the start-up sponsorship from the school and founded this company.

And then he walked me through the things I needed to make this chance work. First, **We** needed to collect all the course information in different overseas universities, and organized them into a clear report for every client, which is a lot of work. Also, the students who used this service didn't have faith in **us** so much at first, so **we** spent quite a long time promoting their company and communicating with **our** clients **under my brother's guidance.** With **our** hard work, **we** finally made it and more and more students would purchase **our** service, so it worked out pretty well.

So, I think my brother really taught me a great lesson by helping me build up the team.

A film you would like to talk about with your friends

The film I want to share with my friends is the one that talks about how 3 people tried their best to build up a successful study tour company.

In the movie, the reason for this company to be built was that there were a lot of needs. Many students had the needs to study abroad, but the chances offered by our own departments were very limited. Then some of them started to search for information and apply for an exchange program by themselves, however, all the application and communication were not easy to them to handle on their own. So, these 3 people took the chance to start this company and make some money by doing this job for those students, so they applied for the start-up sponsorship from the school and founded this company.

However, it wasn't easy for them to run a company at first. They needed to collect all the course information in different overseas universities, and organized them into a clear report for every client, which is a lot of work. Also, the students who used this service didn't have faith in them so much at first, so they spent quite a long time promoting their company and communicating with their clients. With their hard work, they finally made it and more and more students would purchase their service, so it worked out pretty well.

So, I think this movie is really inspiring and would like to share it with my friends.
